## THE STUFF THAT DREAMS ARE MADE OF

Getting old might entail physical deterioration, an increasingly cynical outlook and a belated realisation of the nature of mortality, but hey, look on the bright side – at least you'll get to see what once used to be 'the future' slowly start to appear before your very eyes. Witness, for example, the extravagantly-named 'Light Over Matter Mind Evolution' (or 'Lomme' for short), which closely resembles the kind of 'sleep pods' that 70s-era sci-fi films assured us we'd all be using by now.

More than just a cocoon-like, space age bed, what we have here is nothing less than a 'unique sleep and rejuvenation environment' if Lomme the company are to be believed, which features automated coloured lighting, gorgeous ergonomics and some clever gadgetry for what we can only imagine will be a deeply satisfying night's rest. Each Lomme comes equipped with a climate controlled mattress, can be optionally fitted with a built-in massage system and will apparently even ward off electromagnetic waves and radiation while you slumber, should you so desire.

The Lomme has also been designed with iPhone integration in mind, its soothing lightshows and built-in speakers able to be controlled from Apple's wonder widget. If there's a smarter way to reach the land of nod than this, we've yet to see it...

Price: around £33,000 [www.lomme.com](http://www.lomme.com)
