

THE Urban Shopper is a busy, young professional with little time on their hands to stop in the high street for the latest products. This issue we check out Menu's new stylish yet functional shoehorn and a futuristic 'sleep experience' in the form of the LOMME bed.

Lomme

LOMME (Light Over Matter Mind Evolution) is a unique sleep experience and rejuvenation environment. Using light, sound and massage therapies, LOMME offers an environment to enhance all the senses - forming a place to rejuvenate, meditate and above all sleep. The light system allows the user to choose the strength and colour of the internal light with a colour wheel and limits external noise to distance you from the outside world. An iPod has been invisibly installed to enable the sleeper to listen to relaxing music, and the LOMME mattress is available with an in-built massage system offering a choice of massage options. All of the LOMME functions are controlled by a specially programmed iPhone.

Menu Shoehorn

MOST shoehorns can scarcely measure up to a home's interior design and usually have to settle for a place in the drawer. But this newly designed shoehorn, by Charles Wilson and Menu, is simple and extremely elegant; made of polished steel with magnetic wall mounts, combining both form and functionality.
