WORLDWIDE REVOLUTIONS

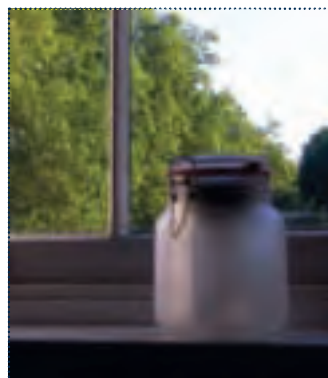

CHANGING THE WAY WE LIVE, WORK & PLAY

HAWORTH ZODY CHAIR

There is absolutely nothing wrong with this chair. It's almost a little too perfect, winning too many awards and having too much recognition, looking a little too hip in any office. Check out this fully customizable office perch, the first chair ever endorsed by the American Physical Therapy Association, developed with the Human Performance Institute at Western Michigan University. Innovative things like arm rests that pivot all directions—laterally and vertically—to support a variety of desk tasks really make a difference. The patent pending asymmetrical lumbar support system comfortably revives your back after a long day. Plus the chair is made of 51% recycled materials, formed in a factory that uses 100% wind power energy, and 98% of it can be recycled at the end of its very, very long life. If you gotta have one when you're tired of your Aeron, visit www.haworth.com/zody for the nearest dealer.

SUN JAR

The Sun Jar, created by Tobias Wong for suckuk.com, is one of their more practical inventions. Wong took a simple frosted Mason canning jar, stuck 3 LED lamps, a solar cell, and rechargeable battery inside, and produced a cool solar lamp that lights up your life for five hours straight, after charging in direct sunlight for only a few hours. Like all Mason jars, the Sun Jar is water tight, so it holds up to any weather condition, still shedding its candle-like glow in the midst of a downpour. You can order the sun jar by visiting www.suckuk.com.

MUSICAL FURNISHINGS

We've all sat around drumming the tabletop with our fingertips, but it took the innovative and daring Tor Clausen to actually follow through with the idea, and create fine furniture made specifically for banging out tunes. Clausen started Musical Furnishings in his sister's garage in 1996, but has since moved on to an old warehouse in Olympia, WA where he creates

his truly musical chairs, tables, chests, and benches. Most of the furniture from Musical Furnishings incorporates a 13-key wooden xylophone into the top surface, and comes with marimba mallets and a songbook so you can literally play your furniture. Made mainly of alder wood, the furniture comes in a variety of finishes to match your décor. Visit www.musicalfurnishings.com to read the cool story of Musical Furnishing's origins.

LOMME BED

Unfortunately, you can't crawl back into the womb on those really bad days, but thanks to Lomme Design Platform out of Liechtenstein and their Lomme Bed, you can climb back into the egg. The unusual egg-shaped bed uses both light and sound therapy to nest you securely and safely in your own microcosm far away from the outside world. The result of two years of research into common sleep problems and their natural therapies, the Lomme Bed was created as a relaxing, protective environment to provide the best sleep possible. The bed even uses gradually increasing light as its built-in alarm clock, making you feel as if you're waking with the sun's rays. With the handmade Lomme Bed, <http://www.lomme.com/news.htm>, there is no wrong side of the bed.
